

Fibre Optic Benefits

Your new home at Valley Park will be installed with the latest fibre optic cabling at no extra cost. It will open up a whole new lifestyle for you and your family, whether your interest is education, business, entertainment or access to online health services.

WHAT IS FIBRE OPTIC CABLING?

Known as fibre to the premises (FTTP) or fibre to the home (FTTH) it offers a range of high quality capabilities for you to take advantage of in your everyday life, such as phone service, free-to-air TV, pay TV and high speed internet.

Fibre optic cables have replaced the copper cables traditionally used by telecommunication companies. A single fibre optic cable has many thousand times the content carrying ability of a copper cable, meaning the network is not likely to need upgrades for many decades.

WHAT DOES IT MEAN FOR ME?

The fibre optic network delivers not only the common services you use today, but will also be able to provide new services such as Internet Protocol Television (IPTV) and Video on Demand (VoD).

As soon as you move into Valley Park you'll be able to take advantage of:

- **Up to two telephone lines**
- **High speed internet** up to 100Mbps. Apps such as iTunes and YouTube will be enhanced by fast music, movie and video downloading and streaming. Enjoy the experience of fast interactive, high definition on-line games, video conferencing with friends and family or make teleworking a reality in your home office.
- **Digital free-to-air TV**, without the need for an unsightly TV antenna on your roof. At Valley Park all our homes are built with TV points located in each living room and the master bedroom.
- **Pay TV services**, such as Foxtel
- **Electronic security monitoring** for an alarm system

Please note: the above services may require connection and/or service charges from retail providers.

WHAT DO I HAVE TO DO?

Very little! Frasers Property Australia and OptiComm will take care of most of the work.

All you need to do is contact a service provider to arrange connections for telephone, internet, etc.

A list of OptiComm's retail service providers is available on their website at www.opticomm.net.au

When speaking with your retail provider:

- a. Inform them you're at Valley Park - an OptiComm Fibre Community
- b. Tell them your full address and whether you've moved in yet
- c. Let them know OptiComm has already installed the fibre optic cable and network termination equipment.

With all the benefits of the high-speed fibre optic network at Valley Park get ready for more fun, faster work and an enjoyable world of entertainment for everyone.
